Vortex Water Revitalizer Kitchen Installation

- Remove the washer located in the envelope reading: Washer for Kitchen Vortex Water Revitalizer.
- Place the washer in the top fitting of the Kitchen Vortex Water Revitalizer.
- 3. If there is a screen on the end of your kitchen faucet, remove it.
- 4. Screw the top fitting of the Kitchen Vortex Water Revitalizer to your kitchen faucet. Use pliers to tighten if needed (use a thick cloth or paper to protect the fitting).

If your tap has an inside thread, use the black plastic adapter located in the envelope reading: Inside Thread Adapter. If you have a pullout kitchen faucet, you will need to purchase a Pullout Faucet Adapter.
